Does Your Doctor Have a Patient Portal?

Have you ever left a doctor's office and realized that you forgot to ask your doctor a question? Can you remember what the doctor told you? More doctors are offering patients access to their health information using a web-based patient portal.

What is a patient portal?

A patient portal is a secure online website that gives patients convenient 24-hour access to personal health information from anywhere with an internet connection. By having a secure username and password, patients can view health information such as:

• Recent doctor visits	• Immunizations
• Discharge summaries	• Allergies
• Medications	• Lab results

How to get started:

- Make sure you have access to a working email address before your next doctor's visit.
 - ◇ You may sign up for a free email account with gmail.com, yahoo.com or hotmail.com
- Ask your doctor if they use a patient portal.
- At your next appointment, sign up for access to your doctor's patient portal.
- After you have signed up, log into your doctor's patient portal to see what information your doctor can provide.
- See if you can communicate with your doctor through the patient portal. It is a safe way to get answers to your questions.
