

Clinical Practice Guidelines

Adopted by CalOptima Health

Clinical practice guidelines (CPGs) help address conditions frequently seen in patients at your practice. All CPGs included have been reviewed and approved by CalOptima Health's Clinical Quality Improvement Committee. All CPGs are connected to links that are simple to access. A detailed document, linked to peer-reviewed or organizational sources, accompanies each link. Additional CPGs can be added upon request and approval by the Clinical Quality Improvement Committee.
