Memo

To: CalOptima Health Board Finance and Audit Committee Members
From: Nancy Huang, Chief Financial Officer
CC: Sharon Dwiars, Clerk of the Board
Date: February 7, 2024
Re: Chief Financial Officer Report: February 20, 2025, Finance and Audit Committee Meeting

Calendar Year (CY) 2024 and 2025 Rate Update

In recent months, staff has communicated our concerns to the California Department of Health Care Services (DHCS) on the sufficiency and appropriateness of funding levels. Late December, DHCS made additional revisions to CalOptima Health's CY 2024 final rates and CY 2025 draft rates that they released previously. Upon analysis, staff found that the rates partially addressed CalOptima Health's concerns, thereby decreasing the gap between our cost and utilization data submission and the rates provided by the State.

The CY 2024 final rates reflected DHCS's reversal of planned rate reductions for the Targeted Provider Rate Increases (TRI) Phase I implementation and member acuity compared to the revised rates released in September 2024. Staff has included a year-to-date true-up of \$39 million in the unaudited financials for December 2024.

The CY 2025 draft rates included updates to trend assumptions, CalAIM Community Support services, and other program changes from the previous version released in October 2024. The net result shows a favorable impact on revenues compared to the Board-approved Fiscal Year 2024-25 Operating Budget. Of note, one area that will directly impact CY 2025 rates is the implementation of Proposition 35 on the Managed Care Organization (MCO) tax. The State will release a plan on the use of MCO tax revenues in the coming months. Staff will continue to monitor this area and provide additional information as it becomes available.

Update on DHCS Submissions

CY 2023 DHCS Special Terms and Conditions Medical Loss Ratio (MLR) Submission:

Staff, along with Provencio, our contracted vendor, worked with each health network to complete their DHCS MLR templates. CalOptima Health submitted the consolidated MLR template and attestation to DHCS on January 15, 2025.

CY 2024 TRI Attestation: In mid-December, staff completed our review of the final TRI submissions from our Health Networks attesting to the timely and appropriate distribution of TRI payments to their sub-capitated providers. On December 30, 2024, CalOptima Health submitted our TRI attestation to DHCS.

Board-designated Reserves Update

At the May 5, 2024, meeting, the Board modified the Board-designated reserve levels from 2.5 to 3.0 months of consolidated monthly revenue and created a separate reserve fund to ensure compliance with tangible net equity (TNE) requirements.

As part of our routine review and in light of future operational needs and revenue forecasts, a transfer of \$50 million from Short-Term Operating to the Board-designated Reserve Fund (Tier One) was completed in January 2025. This transfer increased the reserve level from 2.6 times the consolidated monthly revenue in December 2024, to a reserve level of approximately 2.8. CalOptima Health will continue to monitor the compliance level, revenue and enrollment changes, and provide updates at future meetings.

Six Month Cash Sufficiency

Based upon a review of forecasted revenues and expenses, CalOptima Health has sufficient cash on-hand plus projected revenues to meet its operating requirements for the next six (6) months.

Investments Compared to Reserve Policy

In accordance with CalOptima Health Policy GA.3001: Statutory and Board-designated Reserve Funds that was revised effective June 2024, CalOptima Health shall maintain a minimum reserve level of two point five (2.5) months and a maximum of three (3.0) months in consolidated capitation revenues. The following provides a comparison of investments to the minimum and maximum level of Board-designated reserve funds as of December 31, 2024, demonstrating funds in excess to satisfy minimum requirements.

A) Board-designated Reserve Fund

Reserve Name	Market Value	Benchmark		Variance	
		Low	High	Mkt - Low	Mkt - High
Tier 1 - Payden & Rygel	\$518,375,635

Current Reserve Level (X min. TNE)	1.04	1.00	1.10	-	-

At the end of December 2024, CalOptima Health's Board-designated reserve fund compliance level was 2.64 and the Statutory Designated Reserve Fund was 1.04.

Update on Fund Transfers

Pursuant to CalOptima Health Policy GA 3001: Statutory and Board-Designated Reserve Funds and our review of reserve levels in light of future operational needs and revenue forecasts, a transfer of \$50 million from Short-Term Operating to the Board-designated Reserve Fund (Tier One) was completed in January 2025. This adjustment increased the reserve level from 2.6 times consolidated capitation revenue in December 2024, to a reserve level of approximately 2.8 to 2.9. Each of the two investment managers was informed of the transfer of \$25 million from their respective Short-Term Operating account to their Tier One account. CalOptima Health will continue to monitor the compliance level, revenue and enrollment changes, and provide updates at future meetings.

Next Quarter’s Cash Flow Forecast and Program Update

At the January 27, 2025, meeting, the Investment Advisory Committee (IAC) members and CalOptima Health’s investment managers were updated on forthcoming changes that will affect CalOptima Health’s revenue and expenses.

In mid-January, the Orange County Board of Supervisors approved a change to CalOptima Health’s county ordinance to allow our participation in Covered California. The tentative start

date will be January 1, 2027. We will begin preparing the budget for startup costs. The proposed Fiscal Year (FY) 2025-26 budget will include funding requests to cover implementation costs to address infrastructure needs, system configuration, and regulatory requirements.

DHCS released additional updates to the Calendar Year (CY) 2024 and CY 2025 rates. CY 2024 rates were in line with our budget assumptions, and CY 2025 rates were slightly favorable compared to the estimated budget. CalOptima Health continues to monitor and work closely with the State on any additional rate revisions.

Risk Budgeting Primer

For CIOs, investment staff, and trustees tasked with assessing the risk of a capital pool, risk budgeting provides a structured approach. This practice involves setting a "budget" for risk and then allocating and monitoring that risk across the portfolio.

This paper focuses on risk budgeting at the active risk level, examining how active risk is allocated and managed within a portfolio. We will explore the concept of active risk, why it exists in portfolios, and the expected outcomes for investors based on different levels of active risk exposure.

Cash Flow Gridlock: Understanding the PE Distribution Challenge

Over the last three years, many investors have experienced a considerable decline in the distributions they had grown accustomed to receiving from their private market investments.

The liquidity that fueled a robust cycle of exits and distributions slowed dramatically beginning in 2022, coinciding with the rise in interest rates. Many general partners (GPs) responded by extending hold periods and seeking alternative sources of liquidity, leading to a collective bottleneck in distribution activity in private equity.

MEKETA ESSENTIALS: PORTFOLIO BUILDER LAUNCH AND NEW LANDING PAGE

Meketa Essentials provides an advanced asset allocation and risk management toolset designed to empower chief investment officers, investment staff, and trustees to make data-driven decisions with confidence.

What is the probability of achieving our target returns?

The asset allocation tool within Meketa Essentials uses sophisticated modeling to estimate the likelihood of reaching your target returns over multiple time periods. By providing insights through probability distributions, it enables decision-makers to gauge if their current strategy is aligned with long-term financial goals.

How might our portfolio respond to economic and market shifts?

With capabilities like stress testing and economic regime modeling, Meketa Essentials allows clients to simulate the effects of different growth, inflation, and interest rate scenarios on their portfolios. This helps in understanding potential vulnerabilities and preparing for various market conditions.

Are we effectively managing portfolio risk?

The platform's risk decomposition tool breaks down overall portfolio risk by asset class, helping stakeholders pinpoint which areas contribute most to volatility. Additionally, tools like tracking error analysis provide insights into deviations from benchmarks, enabling a clearer view of whether risks are within acceptable limits.

New this quarter is the release of our **Portfolio Builder** module. With **Portfolio Builder**, users are able to review manager specific information when building portfolios and see how these managers interact when combined in a portfolio. The tool includes a broad array of public markets and liquid alternatives managers, as well as provides the ability for a user to upload managers. It allows for both analysis and optimization of portfolios.

The tool can answer questions such as:

- What is the information ratio of my current global equity allocation? What changes to my portfolio would optimize that information ratio?
- If I were to change the allocations to the managers in my US equity allocation, how would that impact my factor exposures?
- What impact would a change to my fixed income portfolio have had during the recent increase in interest rates?
- How would introducing a new manager affect the tracking error versus my benchmark and my overall risk exposure?

In late September of 2024, a devastating tropical cyclone (Hurricane Helene) made landfall. It caused widespread catastrophic damage and numerous fatalities across the Southeast.

To show our support for the region (which is the location of one of our clients, Warren Wilson College), Meketa encouraged employees to donate to The Community Foundation of Western North Carolina's "Emergency and Disaster Response Fund", matching all donations. We had \$4,820 from 32 employees, and then a 100% match from Meketa for a total of \$9,640 donated.

When families can't afford enough to eat, they often can't meet other basic needs as well, including housing, employment, healthcare, and more. Feeding America helps provide meals to people in need through a network of food banks and helps address root causes of hunger.

As we entered into the last few weeks of the year, we recognized that food insecurity remains a challenge for many in our local communities. During the month of November, the Corporate Responsibility Committee focused on our company value of **Community Influence** by sponsoring a donation matching challenge in support of Feeding America, to which Meketa and its employees have donated close to \$40,000 over the past few years. Again this year, any donations made by employees to Feeding America in the month of November were matched 100% by Meketa.

Not Investing In China: More Of A Political Decision Than A Financial One

By Zack Cziryak | October 15, 2024

The industry is constantly shifting, with landscapes changing and investment managers and consultants determined to keep up, however, a May 2024 whitepaper from investment consultant **Meketa Investment Group** noted that “there has been a clear pivot towards EM exChina.”

Emerging markets ex-China searches have seemed to gather enough traction at this point, with a cyclical trend line depending on the ebbs and flows of Chinese equities performance, according to **Hayley Tran**, managing principal and head of global equity at Meketa. “This dates back to the discussions leading up to and final decision to add China A shares in the MSCI EM Index which has contributed to the subsequent domination of the Index by the country.” “It’s just such a significant concentration in that Index which is a real headwind to active management ... So, the talk of exclusion started then, but I think over time it has sustained further interest especially from the geopolitical front,” she said.

“It is more practical to try to limit China exposure by excluding China listed names versus attempting to minimize China revenue exposure,” Hayley Tran, Meketa.

Too Big to Exit? GPs seek Alternatives

By Chris Witkowsky | October 1, 2024

With slow exit activity, including public filings, several GPs are facing a challenge: What to do with portfolio companies that, after years of successful growth, have become challenging to sell?

“It may be a material consideration: as firms raise larger and larger funds and conduct larger deals, the opportunity set of potential buyers generally grows smaller,” says Mr. Fergusson.

“That can make it more challenging to exit deals and ultimately makes you more reliant on the IPO market, which we know has not been very favorable recently.” – Tad Fergusson, Meketa

PE Poised for a Comeback

By Alex Lynn | December 2, 2024

“US public equities, certainly, but also global equities, have been in a very positive performance trend, and that’s helped the denominator effect,” says Steve Hartt, managing principal at investment consultancy **Meketa Investment Group**. “Folks generally just aren’t feeling so much of that overallocation issue. I think it’s really been the expansion of the denominator that has helped them, that when you do the math, they end up being not so overallocated.”

“Distributions have continued to be on the lighter side, and just not hitting what historical averages have been,” Meketa’s Hartt notes. “I think that it’s been a busier time for transactions in the second half of 2024, but maybe still being a little below what people would hope for. What I’m hearing is 2025 is supposed to be a big year for exits.”

“What I’m hearing is 2025 is supposed to be a big year for exits” – Steven Hartt, Meketa.

Executive Summary

As of December 31, 2024

The value of CalOptima Health's assets was \$3.47 billion on December 31, 2024, compared to \$3.42 billion as of the end of the prior quarter. The Plan had net cash inflows of \$23.0 million during the quarter.

- The Total Plan's net of fees performance for the quarter was 0.762%. The Fixed Income portion (Tier One plus Tier Two) returned -0.043% during the quarter compared to -0.060% for the ICE BofA 1-3 US Treasuries Index. The Operating Account (Cash) returned 1.180% for the quarter net of fees compared to 1.170% for the 90-Day US Treasury Bill.
- The Total Plan's net of fees performance for the trailing year was 5.465%. The Fixed Income portion (Tier One plus Tier Two) returned 4.502% over the past year compared to 4.084% for the ICE BofA 1-3 US Treasuries Index. The Operating Account (Cash) returned 5.661% for the past year compared to 5.251% for the 90-Day US Treasury Bill.
- As of quarter-end, all underlying portfolios were in compliance with sector, issuer, and maturity limits found in the Annual Investment Policy ("AIP").

Q4 Economic and Market Highlights

- Although most major markets finished 2024 in positive territory on a year-to-date basis, in the fourth quarter most markets pulled back with the exception of US stocks.
- The Federal Reserve cut its policy rate another 0.25% in December but its Summary of Economic Projections and hawkish comments provoked a repricing of future rate cuts and roiled bond markets at the year-end.
- As global inflation cooled in 2024, most major bond markets delivered positive returns for the year; however global bond market volatility rose in the fourth quarter with the steepening of the US yield curve even as short-date bond yields declined.
- Many questions remain about what policies will be implemented by the new administration in the US. Although deregulation and tax cuts could support growth, these policies, along with higher tariffs and restrictive immigration, could fan inflation. This will likely lead to additional uncertainty regarding the timing and pace of interest rate cuts in the coming year.

Custom Peer Group

Custom Peer Group

- Given CalOptima Health's unique investment guidelines, traditional fixed income peer groups are not the best comparison tool for the Tier One and Tier Two pools.
- Meketa Investment Group surveyed the eVestment Alliance US Short Duration – Government/Credit Fixed Income universe to create custom peer universes for each of the Tier One and Tier Two pools in order to provide a more accurate performance comparison.
- For the analysis, the eVestment universe was pared down through the elimination of funds with exposure to securities with below “BBB”-rated credit. The combined eVestment universe was further defined that strategies must have an average quality of AA or higher.
 - Two unique buckets were then established based on each portfolio's use of a primary benchmark with “1-3” (years of maturity) in its name (Tier One peer group) or “1-5” in its name (Tier Two peer group).
 - The Tier One peer group consists of 38 strategies with a median effective duration of 1.86 years, while the Tier Two peer group consists of 14 strategies with a median effective duration of 2.60 years as of September 30, 2024.
- Please note that the analysis is as of September 30, 2024, as the universe of investment managers that had reported data as of December 31, 2024, was very small at the date that these materials were submitted.
- This analysis is based on a small peer universe that may change significantly over time, potentially resulting in large changes in peer rankings quarter-to-quarter.

Data as of November 30, 2024

Commentary

US markets rallied in November, while outside the US, markets were mixed.

- After the month-end, the Federal Reserve cut its policy rate another 0.25%, even as unemployment remained low and economic growth was resilient.
- US stocks posted strong returns in November, with the broad market (Russell 3000 +6.7%) outperforming the S&P 500 index (+5.9%).
- In November, emerging market equities lagged developed markets (-3.6%). Non-US developed equities fell (0.6%) on tariff and growth concerns.
- Chinese stocks (MSCI China) sold-off in October, (-5.9%) as investor enthusiasm cooled, awaiting more concrete fiscal policy stimulus from policy makers to address the solvency issues for local governments, the real estate sector, and consumers.
- Global sovereign debt yields generally declined as longer-dated inflation expectations eased post-US elections and economic data missed expectations to the downside across some major economies.
- Looking ahead, key factors influencing the global economic outlook include the paths of inflation, labor markets, and monetary policy, China's slowing economy and the impacts of policy stimulus, increased geopolitical tensions, and questions about new policies from the incoming US administration.

Index Returns¹

- After the November election, US markets rallied while many non-US markets posted negative returns for the month.
- Year-to-date through November, most major asset classes were positive, led by US equities.

Fixed Income: The Bloomberg Universal index rose 1.1% in November, bringing the year-to-date return to +3.6%.

- The broad US bond market (Bloomberg Aggregate) gained 1.1% over the month, with TIPS underperforming as elevated inflation expectations eased.
- High yield bonds outperformed as investor risk appetite remained robust, while emerging market debt weakened on continued US dollar strength and uncertainty about the path of proposed US tariffs by the incoming administration.

- All yield spreads remained below their respective long-run averages, particularly high yield.
- Although spreads are tight, yields remain at above-average levels compared to the last two decades, particularly for short-term issues.

- Volatility levels (VIX) in the US stock market finished the month slightly below its long-run average, while volatility in the bond market (MOVE) ended November slightly above its long-run average.

US Ten-Year Breakeven Inflation and CPI¹

- In November, inflation rose 0.3% month-on-month after four monthly gains of 0.2%, with shelter costs contributing over 40% of the monthly increase.
- Year-over-year inflation increased from 2.6% to 2.7% (matching expectations) largely driven by base year effects. Shelter (+4.7%), transportation (+7.1%), and medical care (+3.7%) contributed to the annual gain while energy prices (-3.2%) fell over the past year.
- Year-over-year core inflation (excluding food and energy) rose 3.3%, also matching expectations.
- Inflation expectations (breakevens) declined slightly in November, on the passing of the US elections and some recent economic data missing to the downside.

¹ Source: FRED. Data is as of November 2024. The CPI and 10 Year Breakeven average lines denote the average values from February 1997 to the present month-end, respectively. Breakeven values represent month-end values for comparative purposes.

Global Inflation (CPI Trailing Twelve Months)¹

- In the eurozone, inflation rose slightly from 2.0% to 2.3% in November (still below the US). The increase was driven by last year’s significant fall in energy prices no longer being included in the calculation.
- Inflation in Japan, continued to moderate (2.5% to 2.3%) due in part to slower increases of gas and electricity prices. Despite the decline, inflation levels remain elevated in Japan, from a historical perspective.
- Inflation in China fell to 0.2% in November. China continues to fight deflationary pressures despite recent stimulus measures.

US Unemployment¹

- In November, the US economy added 227,000 new jobs even as the unemployment rate rose slightly to 4.2%.
- The health care (+54K), leisure and hospitality (+53K) and government (+33K) sectors added the most jobs in November, while retail experienced job losses for the month (-28K).
- The labor market continues to come into balance with job openings (+7.7M) declining from pandemic highs (>9M) with the number of unemployed workers rising from 6.3 million unemployed to 7.1 million unemployed over the past year.
- Separations and hires remain steady at around 5.3 million each and average hourly wages continue to grow at approximately 4.0% a year.

Policy Rates¹

- In the US, the Fed reduced interest rates after the month-end by 0.25% to a range of 4.5% to 4.75%, in a move largely expected by investors.
- The Bank of England made a similar 0.25% interest rate cut in November, while the European Central Bank cut rates by another 0.25% in early December.
- After exiting negative interest rates in 2024 and making several rate increases, rate cutting by other major central banks are complicating prospects for further policy rate hikes in Japan.

US Dollar vs. Broad Currencies¹

- In November, the US dollar strengthened versus other currencies on tariff and trade-war concerns.
- A rise in interest rates driven by potential inflationary impacts of proposed higher tariffs, lower taxes, and immigration policies from candidate, and now president-elect Trump, drove the dollar's gains.

Summary

Key Trends:

- According to the International Monetary Fund's (IMF) October report, global growth in 2025 is expected to be similar to 2024 at around 3.2% with most major economies predicted to avoid a recession.
- Many questions remain about what policies will be implemented by the new administration in the US. Although deregulation and tax cuts could support growth, these policies, along with higher tariffs and restrictive immigration, could fan inflation. This will likely lead to additional uncertainty regarding the timing and pace of interest rate cuts in the coming year.
- US consumers could feel pressure as certain components of inflation (e.g., shelter) remain high, borrowing costs stay elevated, and the job market may weaken further.
- A focus for US equities going forward will be whether earnings can remain resilient if growth slows. Also, the future paths of the large technology companies that have driven market gains will be important.
- We have started to see divergences in monetary policy. Some central banks, such as the Fed, European Central Bank, and the Bank of England, have started to cut interest rates and others, like the Bank of Japan, have increased interest rates. This disparity will likely influence capital flows and currencies.
- China appears to have shifted focus to more policy support for the economy/asset prices with a new suite of fiscal and financial policy stimulus measures. Thus far, these efforts have not increased weak consumer spending or helped the lingering trouble in the real estate sector. It is still not clear what the long-term impact of these policies will be on the economy and if policy makers will remain committed to these efforts.

PERFORMANCE DATA CONTAINED HEREIN REPRESENT PAST PERFORMANCE. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.

Credit Risk: Refers to the risk that the issuer of a fixed income security may default (i.e., the issuer will be unable to make timely principal and/or interest payments on the security).

Duration: Measure of the sensitivity of the price of a bond to a change in its yield to maturity. Duration summarizes, in a single number, the characteristics that cause bond prices to change in response to a change in interest rates. For example, the price of a bond with a duration of three years will rise by approximately 3% for each 1% decrease in its yield to maturity. Conversely, the price will decrease 3% for each 1% increase in the bond's yield. Price changes for two different bonds can be compared using duration. A bond with a duration of six years will exhibit twice the percentage price change of a bond with a three-year duration. The actual calculation of a bond's duration is somewhat complicated, but the idea behind the calculation is straightforward. The first step is to measure the time interval until receipt for each cash flow (coupon and principal payments) from a bond. The second step is to compute a weighted average of these time intervals. Each time interval is measured by the present value of that cash flow. This weighted average is the duration of the bond measured in years.

Information Ratio: This statistic is a measure of the consistency of a portfolio's performance relative to a benchmark. It is calculated by subtracting the benchmark return from the portfolio return (excess return), and dividing the resulting excess return by the standard deviation (volatility) of this excess return. A positive information ratio indicates outperformance versus the benchmark, and the higher the information ratio, the more consistent the outperformance.

Jensen's Alpha: A measure of the average return of a portfolio or investment in excess of what is predicted by its beta or "market" risk. Portfolio Return- [Risk Free Rate+Beta*(market return-Risk Free Rate)].

Market Capitalization: For a firm, market capitalization is the total market value of outstanding common stock. For a portfolio, market capitalization is the sum of the capitalization of each company weighted by the ratio of holdings in that company to total portfolio holdings; thus it is a weighted-average capitalization. Meketa Investment Group considers the largest 65% of the broad domestic equity market as large capitalization, the next 25% of the market as medium capitalization, and the smallest 10% of stocks as small capitalization.

Market Weighted: Stocks in many indices are weighted based on the total market capitalization of the issue. Thus, the individual returns of higher market-capitalization issues will more heavily influence an index's return than the returns of the smaller market-capitalization issues in the index.

Maturity: The date on which a loan, bond, mortgage, or other debt/security becomes due and is to be paid off.

Prepayment Risk: The risk that prepayments will increase (homeowners will prepay all or part of their mortgage) when mortgage interest rates decline; hence, investors' monies will be returned to them in a lower interest rate environment. Also, the risk that prepayments will slow down when mortgage interest rates rise; hence, investors will not have as much money as previously anticipated in a higher interest rate environment. A prepayment is any payment in excess of the scheduled mortgage payment.

Price-Book Value (P/B) Ratio: The current market price of a stock divided by its book value per share. Meketa Investment Group calculates P/B as the current price divided by Compustat's quarterly common equity. Common equity includes common stock, capital surplus, retained earnings, and treasury stock adjusted for both common and nonredeemable preferred stock. Similar to high P/E stocks, stocks with high P/B's tend to be riskier investments.

Price-Earnings (P/E) Ratio: A stock's market price divided by its current or estimated future earnings. Lower P/E ratios often characterize stocks in low growth or mature industries, stocks in groups that have fallen out of favor, or stocks of established blue chip companies with long records of stable earnings and regular dividends. Sometimes a company that has good fundamentals may be viewed unfavorably by the market if it is an industry that is temporarily out of favor. Or a business may have experienced financial problems causing investors to be skeptical about its future. Either of these situations would result in lower relative P/E ratios. Some stocks exhibit above-average sales and earnings growth or expectations for above average growth. Consequently, investors are willing to pay more for these companies' earnings, which results in elevated P/E ratios. In other words, investors will pay more for shares of companies whose profits, in their opinion, are expected to increase faster than average. Because future events are in no way assured, high P/E stocks tend to be riskier and more volatile investments. Meketa Investment Group calculates P/E as the current price divided by the I/B/E/S consensus of twelve-month forecast earnings per share.

Quality Rating: The rank assigned a security by such rating services as Fitch, Moody's, and Standard & Poor's. The rating may be determined by such factors as (1) the likelihood of fulfillment of dividend, income, and principal payment of obligations; (2) the nature and provisions of the issue; and (3) the security's relative position in the event of liquidation of the company. Bonds assigned the top four grades (AAA, AA, A, BBB) are considered investment grade because they are eligible bank investments as determined by the controller of the currency.

Sharpe Ratio: A commonly used measure of risk-adjusted return. It is calculated by subtracting the risk free return (usually three-month Treasury bill) from the portfolio return and dividing the resulting excess return by the portfolio's total risk level (standard deviation). The result is a measure of return per unit of total risk taken. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance.

STIF Account: Short-term investment fund at a custodian bank that invests in cash-equivalent instruments. It is generally used to safely invest the excess cash held by portfolio managers.

Standard Deviation: A measure of the total risk of an asset or a portfolio. Standard deviation measures the dispersion of a set of numbers around a central point (e.g., the average return). If the standard deviation is small, the distribution is concentrated within a narrow range of values. For a normal distribution, about two thirds of the observations will fall within one standard deviation of the mean, and 95% of the observations will fall within two standard deviations of the mean.

Style: The description of the type of approach and strategy utilized by an investment manager to manage funds. For example, the style for equities is determined by portfolio characteristics such as price-to-book value, price-to-earnings ratio, and dividend yield. Equity styles include growth, value, and core.

Tracking Error: A divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark, as defined by the difference in standard deviation.

Yield to Maturity: The yield, or return, provided by a bond to its maturity date; determined by a mathematical process, usually requiring the use of a “basis book.” For example, a 5% bond pays \$5 a year interest on each \$100 par value. To figure its current yield, divide \$5 by \$95—the market price of the bond—and you get 5.26%. Assume that the same bond is due to mature in five years. On the maturity date, the issuer is pledged to pay \$100 for the bond that can be bought now for \$95. In other words, the bond is selling at a discount of 5% below par value. To figure yield to maturity, a simple and approximate method is to divide 5% by the five years to maturity, which equals 1% pro rata yearly. Add that 1% to the 5.26% current yield, and the yield to maturity is roughly 6.26%.

$$\frac{5\% \text{ (discount)}}{5 \text{ (yrs. to maturity)}} = 1\% \text{ pro rata, plus } 5.26\% \text{ (current yield)} = 6.26\% \text{ (yield to maturity)}$$

Yield to Worst: The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call, or sinking fund, are used by the issuer.

NCREIF Property Index (NPI): Measures unleveraged investment performance of a very large pool of individual commercial real estate properties acquired in the private market by tax-exempt institutional investors for investment purposes only. The NPI index is capitalization-weighted for a quarterly time series composite total rate of return.

NCREIF Fund Index - Open End Diversified Core Equity (NFI-ODCE): Measures the investment performance of 28 open-end commingled funds pursuing a core investment strategy that reflects funds' leverage and cash positions. The NFI-ODCE index is equal-weighted and is reported gross and net of fees for a quarterly time series composite total rate of return.

MANAGEMENT REPORTS

1. Chief Financial Officer Report

Nancy Huang, Chief Financial Officer, provided two verbal updates for the meeting. The first update included the Calendar Year (CY) 2025 capitation rates from the Department of Health Care Services (DHCS), the second update was related to the state's recent reconciliation of Proposition 56 direct payments.

For the first update, Ms. Huang began with the CY 2025 Medi-Cal draft rates from DHCS. After reviewing the draft rates, staff found areas of concern. Specifically, staff was concerned with (i) the significant underfunding for CalAIM Community Support Services, (ii) insufficient funding for CalOptima Health's Targeted Provider Rate increase for phase one, and (iii) issues with the trend assumptions in the calendar year 2025 rates compared to actual reported experiences. Ms. Huang stated that CalOptima Health provided feedback to the DHCS contract manager. She added that CalOptima

Health is working in collaboration with the Local Health Plans of California (LHPC) to seek corrections to the significantly underfunded areas in DHCS' rates.

For the second update, Ms. Huang reported that after reviewing the CY 2022 Proposition 56 reconciliation from DHCS, staff identified gaps between CalOptima Health's internal records and DHCS' allowable expenses. Ms. Huang confirmed that staff is addressing these issues with affected networks and providers. She noted that adjustments may be needed based on these findings and that staff will keep the Board updated.

2. Cybersecurity Update

James Steele, Senior Director, Information Security, presented an update on CalOptima Health's cybersecurity. He noted that CalOptima Health has experienced zero major cybersecurity incidents in the previous quarter. However, Mr. Steele noted that CalOptima Health experienced one notable third-party incident involving College Hospital in quarter 3 of 2024. Mr. Steele confirmed that the incident was under investigation, and while it did not directly compromise CalOptima Health's systems, Mr. Steele highlighted the need for ongoing third-party risk management.

Additionally, Mr. Steele updated the committee about relevant cyber security news, cyber security metrics, and the Centers for Medicare & Medicaid Services' and the Health and Human Services' expectations for security controls and artificial intelligence governance.

INVESTMENT ADVISORY COMMITTEE UPDATE

3. Treasurer's Report

Ms. Huang presented the Treasurer's Report for the period of July 1, 2024, through September 30, 2024. The portfolio totaled approximately \$3.4 billion. Of the total portfolio amount, \$2.3 billion was in CalOptima Health's operating account and approximately \$130 million was included in its statutory designated reserve fund to meet the tangible net equity requirements.

Ms. Huang reported that Meketa Investment Group Inc. (Meketa), CalOptima Health's investment advisor, completed an independent review of the monthly investment reports. Meketa reported that all investments were compliant with Government Code section 53600 *et seq.* and with CalOptima Health's Board-approved Annual Investment Policy during that period.

Ms. Huang responded to committee members' comments.

She stated that following further review, Moss Adams identified one formula error in the FY 2023-24 (prior year) column in the audited financial statement package. The error incorrectly presented CalOptima Health's "Net investment in capital assets" and "Unrestricted" net position on pages 4, 6, and 24 of the audited financial statements. Health Network Financial Compliance Review Update

On a quarterly basis, CalOptima Health reviews the unaudited financial statements of the capitated Physician Groups, Hospitals and HMOs that comprise CalOptima Health’s health networks. After internal review, CalOptima Health's financial staff makes a determination as to whether the capitated entity has the ability to assume the risk of a capitated contract. The following provides an overview of the review criteria:

1. Physician Groups and Hospitals: These entities are required to pass the following tests:
 - Current ratio must be greater than or equal to 1.0;
 - Tangible net equity (TNE) must be greater than or equal to 1.0; and
 - Cash to claims ratio must be greater than or equal to 0.75.

HMOs: These entities are required to have a TNE greater of (a) \$1.0 million; (b) percent of premium revenues; or (c) percent of healthcare expenses.

2. Financial Security Reserves and Withhold: Health networks are required to meet the current financial security reserve and withhold levels pursuant to CalOptima Health policy.

Results of the September 30, 2024, Financial Compliance Review: CalOptima Health reviewed the unaudited financial statements for each health network entity for the period ending September 30, 2024, and found that all health networks are in compliance.
